

Amrutha Amara

amaraamrutha9@gmail.com | 513-545-5873 | [LinkedIn](#) | Knoxville, TN, USA (Willing to relocate)

SUMMARY

Full Stack Developer with 4 years of experience building and supporting web applications in C#, Python, and JavaScript. Adept at developing data-driven tools and collaborating with academic and research teams to enhance usability and automation.

PROFESSIONAL EXPERIENCE

Full Stack Developer | *Saayam for All, TN, USA (Remote)*

Jul 2025 – Present

- Contributed to the development of **Python Web APIs** supporting 1K+ active users.
- Implemented multilingual UI components, enhancing accessibility and inclusivity for diverse community groups.

Software Engineer - Digital | *Tata Consultancy Services, Hyderabad, India*

Sep 2020 – May 2024

Client - American Automobile Association (AAA Insurance)

Technologies - Python (automation, data analysis), JavaScript (React), C# (.NET), SQL, REST APIs, Git, AWS, Azure

- Designed and optimized RESTful APIs in **C# and Python** to streamline workflows and integrate with internal data services, improving operational efficiency across teams.
- Developed API's using **C#, Node.js and AWS (Git)** to automate address update requests, reducing manual processing time.
- Increased **Smart Link registrations** by integrating SMS and Email APIs into document-based communication workflows.
- Streamlined **high-volume batch processing** for renewals and reports in Python, reducing manual effort.
- Reduced API payload size by 30% by converting **IVR services from XML to JSON**, accelerating mobile app response times.
- Resolved **100+ production incidents in a .NET web application** by performing root cause analysis (RCA) and in-depth debugging using Visual Studio, reducing average resolution time.
- Processed 5,000+ new member records weekly by developing a **C# WinForms-based batch job**, streamlining North Carolina membership onboarding and reducing errors.
- Enhanced **Python scripts** for data validation and anomaly detection, eliminating 98% of data inconsistencies.
- Performed comprehensive functional, unit and regression testing to validate business requirements before QA handover.
- Contributed to 30+ Agile sprints by supporting sprint planning, enabling delivery of 50+ new features across multiple project phases.
- Monitored scheduled batch jobs (AutoBill, MPP) and ensured **99.9% uptime**, supporting uninterrupted financial transactions.
- Conducted **peer code reviews** and contributed to process improvements, enhancing code quality and maintainability.

PROJECT EXPERIENCE

Inventory Management System | *C#, WPF, MVVM, SQL*

- Designed a desktop-based inventory management tool with **real-time stock tracking**, eliminating reconciliation errors.
- Implemented **MVVM pattern** for clean separation of concerns, improving scalability and maintainability.

AI-Powered Trip Planner (WanderWise) | *React, Vite, Tailwind CSS, Firebase, Gemini AI*

- Built an AI-driven travel planner generating **personalized itineraries** using Gemini AI, cutting trip planning time.
- Integrated **Auth0 authentication** and Firebase real-time database for secure user sessions and collaborative itinerary editing.

TECHNICAL SKILLS

Languages: Python, C#, JavaScript, SQL, HTML, CSS

Frameworks & Tools: .NET Core, ASP.NET MVC/Web API, EF Core, LINQ, React.js, WPF, Postman, Swagger

Databases: SQL Server, DB2, MySQL, PostgreSQL

DevOps / CI/CD: AWS (Lambda, S3, DynamoDB, CloudWatch), Azure (Web Apps), CI/CD pipelines

Practices: Full-stack development, REST APIs, Microservices, TDD, Automated Testing, Logging & Monitoring, Agile/Scrum

EDUCATION

Master's in Information Technology - University of Cincinnati | 4.0/4.0

Graduated: May 2025

Bachelor's in Computer Science - Vignan's University | 9.9/10

Graduated: Jun 2020

Courses – Object-Oriented Programming (Java), Data Structures, Python, Machine Learning, Artificial Intelligence, SQL, Linux/Unix

AWARDS & ACHIEVEMENTS

- Graduate Teaching Assistantship**, University of Cincinnati — Full-ride merit-based assistantship
- Collaborated with faculty and 200+ students as Graduate Teaching Assistant in Object-Oriented Programming and Web Development, fostering technical problem-solving and inclusive learning.
- Contextual Master Award at TCS for developing an innovative solution that contributed to client growth
- On The Spot Award at TCS for successful delivery of the project without any postproduction issues

COVER LETTER

Amrutha Amara
Canton, MI (Willing to relocate)

Hiring Committee

College of Engineering – Robotics Department
University of Michigan
Ann Arbor, MI

Dear Hiring Committee,

When I first began writing code, I was fascinated not by syntax, but by what it enabled, ideas turning into something that others could actually use. That same curiosity has guided me through building APIs that serve thousands of users, mentoring students who were learning to debug their first programs, and automating the kind of small, everyday tasks that quietly make research and collaboration easier.

At Tata Consultancy Services, I worked on large-scale systems in C#, Python, and JavaScript, experiences that taught me how structure and precision create reliability at scale. Later, as a Graduate Teaching Assistant at the University of Cincinnati, I saw the other side of software: how thoughtful tools can free people to focus on creativity, learning, and research. That blend of engineering discipline and academic purpose is exactly what draws me to Michigan's Robotics Department.

I'm especially motivated by roles where code is both a craft and a contribution where a well-designed script or web app directly helps researchers, students, and staff accomplish more. I bring a developer's rigor and a teacher's patience, and I'd be excited to apply both within a community that values innovation with impact.

Thank you for considering my application. I would be delighted to discuss how my experience in full-stack development and academic collaboration can support the department's ongoing projects.

Sincerely,

Amrutha Amara
