23rd October 2025

To whom it may concern,

As an aspiring software engineer and cybersecurity specialist, I was quite excited to see job openings in my field open up at my university. My number one career priority is to do work that has a positive impact on my community, and working at a top tier research university such as UofM is a great way to achieve that.

My education and work experience have helped me develop my knowledge in Computer Science, Environmental Science, Computer Architecture, Computer Security, Cryptography, and Information Science. I have experience working with various APIs for projects, such as the Valorant and Spotify APIs, as well as experience working with LLMs such as OLLama. My information science, computer security, cryptography, and computer architecture experience come from various class projects, such as using C to build a simplified cache, assembler, linker, and pipeline, or protecting against SQL injection, XSS, and CSRF attacks. I believe that these diverse skills and experiences will be incredibly helpful at UofM, especially when it comes to assisting others in troubleshooting complex software issues.

My fluency in Spanish and my experiences in volunteering with my local church have given me a wide perspective and skills in communicating. This was particularly useful during my time as a telephone agent at Morley, helping new Medicare recipients understand the basics of their coverage and how to make use of their benefits, as well as assisting with prescription refills. Healthcare is a very complex topic to discuss, so having these communication skills made my interactions with the end user more helpful, and I am proud of that work in the healthcare sector. I believe these skills will also be helpful at UofM, where the ability to effectively communicate is highly regarded.

I believe that you will find, and my references will verify, that I am a very organized, adaptable, responsible, and driven person who contributes positively to the working environment. I look forward to hearing from you, and to the possibility of joining the UofM team and contributing to its continued growth and success.

Many thanks,

Brandon Geib

EDUCATION

University of Michigan, Ann Arbor, MI

May 2025

- Degree: Computer Science / Minor Environmental Science
- Coursework: Computer Organization, Algorithms, Software Engineering, Data Structures, Multivariable & Vector Calculus, Discrete Mathematics, Stats & Data Analysis, Intro to Cryptography, and Intro to Computer Security

Midland High School, Midland, MI

May 2021

- Honors: Graduated Summa Cum Laude, GPA: 3.89

JOB EXPERIENCE

Morley Companies, Saginaw, MI— Customer Service Representative (Healthcare)

Summer 2023/24

- Make courtesy calls on behalf of healthcare providers
- Organize meetings for the UAW Trust

Egyptian Kosher, Midland, MI— Cashier/Cook/Caterer

Summer 2021/22

- Stand Manager for Mid-Michigan Farmers Markets
- Event Caterer

MSU St. Andrews, Midland, MI— Programming Researcher

Summer 2020

- Team member, building machine learning algorithms in Python within Github.

LEADERSHIP

Midland UCC Youth Group— Member

Sept 2015 - May 2021

- Leader & Volunteer for social justice efforts in the Midland area

Midland High School Robotics Team— Art Lead, Programmer

Sept 2017 - April 2020

- Robot programming in Java
- Design leader of team shirts, banners, and other apparel

ACTIVITIES

University of Michigan Esports Organization- Recreational Team Member

August 2023 - Present

- Led the UMich Azure team during matches

University of Michigan LGBT+ Organization— Member

Jul 2022 - Present

- Event & resource organizer for LGBT+ students

Mass. Institute of Technology Puzzle Hunt— Participant

Jan 2022, Jan 2023

University of Michigan LivingArtsEngine— Member

Sept 2021 - May 2022

University of Michigan Archery— Member

Sept 2024 - Present

COMMUNITY INVOLVEMENT

University of Michigan Political Community— Member

Nov 2022 - Present

- Petition drive & voter registration event organizer

PROJECTS

API Application Development

March - May 2024

- Worked alone using the Valorant API to update an open-source app that scans through matches to generate personalized statistics
- Work was focused mostly on reverse-engineering of open source app & Valorant API, as well as integration of new changes in a manner consistent with the previous development

Major Design Experience - JukeBot

Jan - May 2025

- Worked in a large team using OLLama, Spotify API, Flask, and Svelte to create a Gen AI based Spotify playlist creator
- Work was focused mostly on integration between OLLama output and Spotify API input. Handled parsing of LLM output, user authentication via Spotify API, song searching via Spotify API, playlist creation, and output of completed playlist link

AWARDS/RECOGNITIONS

Midland High Robotics Team:

- 1st Place, Dow District Tournament
- Finalist, Dow Division, Michigan Regional Tournament
- 25th Place, Curie Division, Detroit Worlds Tournament

Spring 2018/19

Spring 2019

Spring 2019

Michigan Seal of Biliteracy

May 2021

Murdale Leysath Leadership Award

Oct 2019

SKILLS

General Computer Skills: Microsoft Office, Google Workspace, Shell Navigation, Windows, Ubuntu, and Virtual Machines

Languages: Fluent in Spanish (written and spoken)

Computer Languages: C++, C, Java, Python, Assembly
