
Dear Hiring Committee,

I am excited to apply for the Applications Programmer Associate position within the College of Engineering's Robotics Department at the University of Michigan. My background in web application development and collaborative problem-solving aligns closely with the responsibilities of this role. I am especially drawn to the opportunity to build and support software tools that advance robotics research and education.

In my current role as a Web Developer at Haas Door, I have designed, coded, tested, and maintained automation tools and web applications using C#, ASP.NET, and Blazor, while also working with MSSQL for data management. For example, I developed a Selenium-based automation system for our garage-door configurator, which improved bug-detection accuracy and reduced manual testing time. This project demonstrated my ability to devise technical solutions for complex problems, document processes, debug malfunctions, and refine system logic.

Beyond my professional experience, I have self-taught expertise in web development and am adept at deploying web applications. My Job Search Application, built with HTML, CSS, JavaScript, MongoDB, and Puppeteer, showcases my ability to develop back-end structures, handle database interactions, and create user-friendly interfaces. In both my personal and professional work, I have routinely translated user needs into practical, efficient tools.

While I have not yet worked directly in a higher-education setting, I bring a proven track record of quickly learning new domains. I am eager to apply my strong analytical mindset to gather requirements, develop robust code, and collaborate with the Robotics Department's staff. My commitment to writing clean, secure code means I will readily adopt any security and compliance protocols your team follows.

I am confident that my technical proficiency, adaptability, and enthusiasm for the tech field make me a strong fit for this role. Thank you for your time and consideration. I welcome the opportunity to discuss how my skills can contribute to the success of the College of Engineering's Robotics Department.

Warm regards,
Brooks Susor

Experience

Web Developer - *Haas Door, Wauseon OH*
July 2023 - Present

In-House Website Redesign

Worked with the team to build a new customer-facing website from the ground up using the web framework Wisej.NET, transitioning it entirely in-house, and enhancing user experience and functionality.

Garage Door Web Scraper

Built a web scraping solution with C# and Selenium to automate the garage door configurator, significantly reducing testing time and improving bug detection accuracy.

Online Store Front-End Development

Collaborated closely with the team to revamp the company's online store frontend, using Blazor and incorporating responsive design principles for improved performance and scalability.

Inventory Search Modal Update

Enhanced the inventory search modal by implementing HTML, CSS, JavaScript, and utilizing regular expressions, resulting in increased search accuracy.

Skills & Knowledge

Front-End Development

- HTML
- CSS
- JavaScript
- React.js

Back-End Development

- MongoDB
- MSSQL
- C#
- Java

Web Scraping & Automation

- ASP.NET
- Selenium
- Puppeteer
- Automation Scripting

Personal Projects

Job Search Web Scraper- <https://stringingjobs.com>

Developed a web scraping application using Puppeteer and CSS selectors to automate job board data extraction, including error handling and parsing for improved job application workflows.

Pokémon Team Builder - <https://brookssuz.github.io/pokemon-team-builder>

Designed and implemented a web application with CRUD operations using HTML, CSS, JavaScript, React, and Firebase, allowing users to create and customize Pokémon teams.

Education

Bachelor of Arts in Philosophy - *University of Toledo, Toledo OH*
August 2016 - December 2020

Cumulative GPA: 3.7 | Major GPA: 3.9

Developed strong analytical and problem-solving skills through coursework in logic and critical reasoning.
