EDUCATION

University of Michigan – Dearborn

Bachelor of Science in Computer Science - December, 2024

EXPERIENCE

University of Michigan – Dearborn Academic Experience

Senior Design (Capstone Project) | August – December, 2024

- *Designed and deployed a full-stack application using AWS EC2 and Elastic Beanstalk for scalable and reliable hosting of a Node.js/Express.js backend with RESTful APIs*
- *Leveraged AWS RDS with PostgreSQL for secure, efficient, and managed relational database services*
- *Utilized React Native, Typescript and Expo to develop a cross-platform, front end application*
- *Integrated AWS S3 for storing and serving static assets, including user-uploaded content and media*
- *Gained experience developing a full stack solution for a client's needs*

Database Management Systems | January – May, 2024

- *Explored database languages, query processing, & optimization techniques*
- *Learned about concurrency control, recovery mechanisms, & database security*
- *Gained practical experience in designing & implementing database systems, SQL and NoSQL*

Java Programming | August – December, 2023

- *Gained a deeper understanding of object-oriented programming through Java language*
- *Developed small applets with JavaFX and SceneBuilder*
- *Utilized Java to create a server/client program involving multi-user networked applications*

Professional

Sizeland Medicare | IT, Salesforce, Web | August, 2021 – Present

- *Supported the integration and maintenance of computer systems and internet infrastructure*
- *Contributed to the implementation and optimization of Salesforce processes*
- *Helped update the main Sizeland Medicare website and assisted in its migration to a new platform*

Vittoria Coffee | Regional Sales Director | January, 2016 – February, 2021

- *Collaborated on sales campaign efforts to ensure company production and growth*
- *Managed accounts payable bills and back stock to plan for future orders*
- *Regularly conducted in-person meetings with clients*

SKILLS

- *Experienced with Java, Kotlin, React Native, React, TypeScript, Express.js, Node.js, HTML, CSS, AWS, GIT, VSCode, IntelliJ IDEA, Jira, Google Suite, Salesforce CRM, Docker*
- *Proficient in JavaScript, RESTful API's, MongoDB, PHP, C++, C#, Python, SQLite, MySQL, RAG*

Re: Job ID 269830 (Applications Programmer Assoc)

Dear Hiring Committee,

I am writing to express my interest in the Programmer position within the Robotics department. I recently completed my Bachelor of Science in Computer Science at the University of Michigan–Dearborn and bring hands-on experience in full-stack application development, database management, and technical support that aligns closely with your team's needs.

During my senior design capstone, I helped design and deploy a full-stack application using AWS EC2, Elastic Beanstalk, and a Node.js/Express.js backend connected to a PostgreSQL database. On the front end, I developed a cross-platform React Native and TypeScript application, integrating AWS S3 for asset management. This experience strengthened my ability to translate user requirements into efficient, secure, and scalable solutions—skills directly relevant to the Robotics department's development and support responsibilities.

In addition to my academic projects, my role at Sizeland Medicare has given me practical experience supporting web infrastructure, optimizing Salesforce processes, and assisting with website migrations. These experiences have enhanced my troubleshooting abilities, attention to detail, and communication skills with both technical and non-technical stakeholders.

I am eager to contribute my skills in JavaScript, Python, and database development to support the Robotics department's mission and continuous process improvement. I would welcome the opportunity to discuss how I can add value to your team.

Thank you for considering my application. I look forward to the possibility of contributing to your department's ongoing success.

Sincerely,
Daniel Hallanger
