

Neil Nahar

Full Stack Developer

naharneil@gmail.com | +1 (903) 867-0137 | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

SUMMARY:

- Full Stack Developer with 5+ years of experience specializing in the MERN stack (MongoDB, Express.js, React.js, Node.js), Python, and AWS (EC2) cloud technologies to deliver scalable, AI-enhanced web applications.
- Skilled in designing and deploying RESTful APIs, microservices, and high-performance front-end interfaces, driving efficiency and seamless user experiences for 1,000+ users.
- Strong collaborator in Agile environments, skilled at translating complex business needs and support team requirements into maintainable solutions, while writing, testing, and debugging applications using JavaScript/Python, TDD, and OOP best practices.

PROFESSIONAL EXPERIENCE:

Full Stack Developer, Qualcomm, New York, NY | May 2023 - Present

- Constructed backend REST APIs with Node.js and Express, resolving application support issues and debugging production defects to minimize downtime by 25% and improve operational reliability.
- Developed scalable MERN and GraphQL applications, writing efficient database queries and scripts to improve data retrieval by 25% through refined queries and caching.
- Designed and deployed microservices on AWS EC2 using NGINX reverse proxy and PM2, ensuring zero downtime, scalable production environments, and end-to-end encryption with TLS/SSL security protocols. Configured and managed domain setup with Cloudflare, handling DNS records, nameserver updates, and SSL/TLS certificates for secure, HTTPS-enabled deployments.
- Delivered high-performance apps on Netlify, achieving 20% faster response times and 30% lower server latency through comprehensive SEO and performance optimizations.
- Created responsive, component-driven UIs with React and Redux, cutting development time by 20% and boosting performance by 15%.
- Collaborated with a team of 4 UI/UX designers to transform wireframes into cross-browser, responsive interfaces adopted by 15,000+ users across desktop and mobile platforms.
- Participated in QA activities, conducted code reviews, and refactored React/Node.js applications for scalability and maintainability, ensuring quality by testing, documenting fixes, and resolving defects.

UI Developer, BT Group, India | March 2020 - July 2022

- Architected an AI-powered recommendation engine using OpenAI API, Axios, and Fetch, boosting user retention by 25% and satisfaction by 15% from 500+ reviews.
- Developed responsive UIs for 10+ product features, gathering requirements from stakeholders and support teams to translate user needs into scalable application interfaces. Provided ongoing application support, troubleshooting issues, monitoring performance, and documenting solutions to improve reliability and reduce support effort.
- Translated wireframes into scalable frontends with TypeScript and Tailwind CSS for 8+ product modules, ensuring pixel-perfect design accuracy across desktop, tablet, and mobile screens.
- Integrated real-time APIs with AJAX/JSON and secured authentication with Firebase for 3 applications, elevating performance through React memoization and reducing render time by 30%.

React JS Developer, TATA Teleservices, India | Jan 2019 - Feb 2020

- Engineered responsive UIs with React, Redux, and Bootstrap, streamlining state management and leading the adoption of code splitting and lazy loading, which improved load times by 25% and reduced rendering by 1.2s.
- Developed and optimized a full-featured CRUD application with React (Hooks) and Firebase, managing 1,000+ tasks and improving page load time by 35% across key components through performance diagnostics and debugging.
- Automated workflows with Python (Pandas and NumPy), cutting manual effort by 30% and saving 15+ hours weekly.
- Designed full-stack apps with React, Node.js, and Next.js, delivering clean, maintainable code and seamless API integration.

TECHNICAL SKILLS:

- **Languages:** Python (Pandas, NumPy), JavaScript (ES5/ES6+)
- **Web Technologies:** React.js, Redux, React Native, Node.js, Express.js, Next.js, Vue.js, TypeScript, AngularJS, HTML5, CSS3, Bootstrap, Tailwind CSS, React Router, Sass, jQuery, AJAX, React DevTools, Chrome DevTools, Handlebars, JSX, RESTful APIs, GraphQL, Web Services (SOAP), JSON, XML, OpenAI API, API Integration, API Integration, HTTPS/SSL configuration, Cloudflare Full/Strict SSL setup
- **Cloud and Databases:** AWS (EC2, API Gateway, SES), NGINX, PM2, Firebase, SQL, MongoDB, PostgreSQL, MySQL, Cassandra, DynamoDB
- **Other Technical Proficiencies:** Git, GitHub, GitLab, Bitbucket, Webpack, Babel, Parcel, Gulp, Jest, Jasmine, Selenium, Cucumber, Bash, Postman, VS Code, Flux, JAVA, Figma, Jira, Agile Methodologies (Scrum, Extreme Programming, Waterfall), SDLC, Wireframing, Mockups

EDUCATION:

- **Master of Science in Computer Science** - *University of Texas at Arlington*, Texas, USA
Coursework: Data Structures & Algorithms, Software Engineering, Distributed Systems, Web Data Management
- **Bachelor of Computer Science** - *Jodhpur Institute of Engineering & Technology*, India

PROJECTS:

- [Eazymart](#): A scalable MERN stack e-commerce platform.
- [Streamsmart](#): An AI-powered movie recommendation platform using OpenAI's API.
- [FoodMarket](#): A responsive food delivery UI built with React.

October 23, 2025

Dear Hiring Manager,

I am writing to express my interest in the Applications Programmer Associate position within the Robotics Department at the University of Michigan. With more than five years of experience in full stack development using JavaScript, Python, and modern web technologies, I am excited about the opportunity to build reliable applications that support your internal users, improve department processes, and contribute to academic innovation.

In my current role at Qualcomm, I develop and support full stack applications that serve large user bases. I write and test code for scalable REST APIs using Node.js and create responsive front end interfaces using React. I also monitor application performance, debug production issues, and document solutions to ensure smooth ongoing operation. By working closely with support teams and end users, I translate functional needs into practical tools that improve efficiency and user experience. These responsibilities closely align with this role's focus on application support, troubleshooting, requirement gathering, and continuous improvement.

During my work at BT Group, I gained valuable experience gathering requirements from non technical stakeholders, writing clean and maintainable code, and supporting applications through their full lifecycle. I also worked with SQL and NoSQL databases to write queries and scripts, improving data accuracy and application performance. I actively contributed to QA efforts by testing features, identifying defects, and assisting in their resolution. This experience has strengthened my ability to collaborate, communicate clearly, and deliver dependable applications in a team setting.

I am particularly drawn to this opportunity because I value the mission of higher education and enjoy building tools that empower students, researchers, and academic teams. I take pride in writing secure, compliant software and I am self directed, organized, and comfortable managing multiple priorities. I believe my technical background, attention to detail, and passion for problem solving make me a strong fit for this role.

Thank you for considering my application. I would welcome the opportunity to contribute to the Robotics Department and to discuss how my skills can support your goals.

Sincerely,
Neil Nahar
