

Hiring Committee
Ann Arbor, MI

October 24, 2025

Dear Hiring Committee,

I am writing to express my interest in the Applications Programmer Associate position with the University of Michigan's Robotics Department. As a Computer Science student at the University of Arkansas at Little Rock (expected graduation Dec 2025) with experience in Python, JavaScript, and full-stack development, I am eager to contribute to Michigan Engineering's mission of building a people-first future through technology and innovation.

During my studies, I have developed and deployed several software projects, including a Python automation tool that dynamically updates Windows desktop backgrounds and a responsive portfolio website using HTML, CSS, and JavaScript hosted via GitHub Pages. These projects strengthened my skills in coding, debugging, and optimizing web-based applications—abilities that directly align with the coding and application support responsibilities for this role.

I also bring a strong foundation in data management and DevOps practices, with hands-on experience using SQL databases, AWS, and Git-based version control. Through coursework in Data Structures, Algorithms, and Web Application Development, I have learned to design scalable, efficient solutions that meet user needs while maintaining security and compliance. My customer service and volunteer work have further refined my ability to collaborate with non-technical stakeholders, troubleshoot issues in real time, and communicate solutions clearly—key skills for supporting robotics faculty, researchers, and students.

I am particularly drawn to Michigan Engineering's emphasis on collaboration, lifelong learning, and service for the common good. I believe my combination of technical expertise, adaptability, and commitment to learning makes me well-suited to contribute to your team's ongoing mission of technological excellence. I would welcome the opportunity to support the Robotics Department's innovative projects while continuing to grow as a software developer in a research-driven environment.

Thank you for your time and consideration. I look forward to the opportunity to discuss how I can contribute to your team's success.

Sincerely,
Olivia Sabb

Motivated Computer Science student at the University of Arkansas at Little Rock (expected Dec 2025) with hands-on experience developing and maintaining web applications using JavaScript, Python, and Java. Skilled in writing clean, testable code and working with SQL databases, REST APIs, and DevOps tools such as Git and AWS. Passionate about building reliable, user-focused systems and collaborating across technical and non-technical teams to deliver secure, high-quality software solutions.

EDUCATION

University of Arkansas at Little Rock

Little Rock, Arkansas

Bachelor's Computer Science

- **Concentrations:** Software and application development
- **Related Coursework:** Data Structures & Algorithms, Computer Organization & Programming, Object-Oriented Programming, Statistics, Web App Development, DevOps
- **Note:** Began college career early accelerating my learning and advancing my coding proficiency.

CERTIFICATIONS

- In Progress: CompTIA Security+ CE

EMPLOYMENT EXPERIENCE

Hardee's Cashier

Little Rock, Arkansas
January 2022-July 2022

- Provided excellent customer service, boosting positive feedback by 20%.
- Collaborated in a fast-paced environment, strengthening teamwork and communication skills.
- Streamlined operations by mastering POS systems and reducing transaction time by 15%.

PROJECTS

Windows background changer

Little Rock, Arkansas

Project Developer

January 2024-February 2024

- Developed a Python automation tool for rotating Windows desktop backgrounds at custom intervals.
- Utilized file handling and scheduling libraries, demonstrating scripting and OS integration skills.
- Showcased efficient automation for improved user experience.

Personal Portfolio

Little Rock, Arkansas

Project Developer

July, 2025-August, 2025

- Designed and deployed a responsive website using HTML, CSS, and JavaScript, hosted via GitHub Pages.
- Implemented accessible UI design and optimized load time by 20%.
- Integrated project showcase and links for continuous deployment visibility.

ACTIVITIES AND LEADERSHIP

University of Arkansas at Little Rock Little Rock, Arkansas

Little Rock, Arkansas

Volunteer - UALR campus garden

August 2024-June 2025

- Collaborated with a student-led garden team to implement sustainable cultivation practices, boosting yield by 6% while maintaining a pesticide-free environment.

SKILLS

Languages: JavaScript, TypeScript, Java, Python,

Web & Cloud: HTML, CSS3, Node.js, React.js, NestJS, AWS

Databases: SQL, MySQL, Oracle

DevOps & Tools: StyleSheet API, React, Git, Eclipse, Visual Studio, PowerBI, XML

Soft Skills: Strong communicator, collaborative team player, adaptable, detail-oriented
