Hiring Team
University of Michigan
1109 Geddes Ave., Ann Arbor, MI 48109

Dear Hiring Team,

I am writing to express my enthusiasm for the Applications Programmer Assoc position at the University of Michigan. With a Bachelor's Degree in Computer Science from the University of Wisconsin Oshkosh and extensive experience in web application development, I am excited about the opportunity to contribute to the Robotics department using my technical skills I've obtained.

In my previous role as a Senior Programmer and Web Developer at wisnet.com, LLC, I successfully led projects involving requirements gathering, coding, testing, and debugging applications using JavaScript and Python. My experience in higher education, particularly as a Python Programmer at the University of Wisconsin-Oshkosh, has equipped me with the ability to translate complex technical concepts into practical solutions for the nontechnical person. I am proficient in database interactions and understand security protocols, ensuring compliance with industry standards.

I am particularly drawn to Michigan Engineering's mission to foster an inclusive community and tackle societal challenges through technology. I am eager to be part of a team that prioritizes the common good while continuously improving processes within the Robotics department.

Thank you for considering my application. I'm anticipating driving there and staying on campus. I look forward to the opportunity to discuss how my background and skills can contribute to your continued success. I can be reached to schedule a conversation. Please email me before calling.

Sincerely,
William Clements
