

October 28, 2025

Dear Hiring Manager,

I am writing to express my interest in the Applications Programmer Associate position (Job ID 270067) with the University of Michigan's College of Engineering. With hands-on experience in software development and a strong background in business analysis, I am eager to contribute to U-M's mission of advancing innovative, people-centered technology.

As an Associate Technical Consultant at Perficient, I collaborated with cross-functional teams to deliver software solutions that improved system efficiency and team performance. I created process documentation, facilitated Agile workshops, and participated in test case design and implementation. Additionally, my capstone project developing a MERN-stack asset management application strengthened my skills in JavaScript, HTML, CSS, Node.js, Git, and database design—tools that align directly with the technologies used at U-M.

I am drawn to the University's culture of collaboration and continuous learning, and I would welcome the opportunity to support application development and improvement efforts within the Robotics department. Thank you for considering my application; I look forward to the possibility of contributing to your team.

Sincerely, Sean Mick

Sean Mick

Software Professional

Entry-level software engineer with a background as a business analyst, skilled in translating business requirements into technical solutions. Eager to leverage analytical and problem-solving skills to contribute to software development while growing in a dynamic team environment.

EXPERIENCE

Perficient, Livonia, MI — Associate Technical Consultant

JUNE 2023 - MAY 2025

Project: Major Automotive Company - Business Analyst

- Collaborated with Product Owners and Scrum Teams to define and prioritize user stories, ensuring alignment with business goals and customer needs and increasing team velocity by 20%.
- Facilitated 2 to 3 weekly workshops and meetings with cross-functional teams, including design, legal, and accessibility teams, to align business goals with technical capabilities
- Created process flow diagrams, wireframes, and other documentation to illustrate business requirements and proposed solutions.
- Participated in test case reviews with quality assurance, offering insights on business priorities and ensuring that test coverage accurately reflected critical business processes.
- Conducted detailed data mapping to ensure seamless integration between various systems and databases.

College Capstone — Developer

SEPT 2022 - APRIL 2023

Project: Stuff Stash - Asset Management Website

- Co-led the end-to-end development of an asset management website using the MERN stack to streamline the tracking and management of company assets.
- Designed and implemented a highly flexible data schema to allow for fluid connection with custom backend API.
- Developed RESTful APIs using Node.js and Express.js to handle CRUD operations for assets, ensuring scalability and efficient data management.

EDUCATION

Eastern Michigan University, Ypsilanti, MI — Computer Science Applied (BS), Cum Laude
