

Nicholas Wohlfeil
Ann Arbor, MI 48109
October 26, 2025

Dear Hiring Committee,

I hope you are doing well. I am writing to express my interest in the open Applications Programmer Associate position recently posted within the Robotics Department at the University of Michigan. Over the past year, I have had the pleasure to serve as an Administrative Assistant in this same department, during which I have had the opportunity to grow both professionally and personally. This experience has given me a strong understanding of the department's priorities, values, and culture as well as a deeper understanding of how my work may contribute to our shared goals.

During my time with Robotics, I have been given the opportunity to collaborate on a variety of software projects, most notably in web development, across multiple departments and services that benefit both students and staff. Through these experiences, I have developed a solid understanding of the College of Engineering's development workflows and the Robotics Department's technical and administrative needs. I have also gained hands-on familiarity with the frameworks and systems commonly used by CoE developers, such as Vue and Vite, and how they integrate with PHP to access the current database structure to create dynamic and reliable applications. In addition, I have prior experience utilizing programming interfaces to parse and analyze large datasets, a skill that may also directly benefit faculty and staff beyond CoE-wide development work.

This opportunity is particularly appealing to me because it would provide me the chance to expand my impact within the department in a way more complimented by my technical background. In a full-time developer role, I would be able to continue supporting our students and staff through a more technical and creative lens. My background in student academic support, human-centered design and development, and administrative work provides me with a strong mix of skills that complement one another in a way that has prepared me well for a role like this. I believe that my ability to work collaboratively or independently will offer me the flexibility to be able to approach foreseeable challenges with a department-focused mindset.

Thank you for your time and consideration. If you would like to reach out to further discuss how my skills and experience may align with the Applications Programmer Associate role, I can be reached at njwohlf@umich.edu. Have a great day!

Sincerely,
Nicholas Wohlfeil

NICHOLAS J. WOHLFEIL

EDUCATION

COLLEGE OF ENGINEERING / UNIVERSITY OF MICHIGAN — Ann Arbor, MI

Computer Science Engineering BSE, Class of 2024

Extracurriculars: Institute of Electrical and Electronics Engineers Leadership, Kessler Presidential Scholars Leadership, Michigan Research and Discovery Scholars Leadership, Michigan Autonomous Aerial Vehicles, Comprehensive Studies Program Leadership

PROFESSIONAL EXPERIENCE

University of Michigan Robotics — Ann Arbor, MI

Administrative Assistant, December 2024 - Current

- Developed and maintained full-stack applications with Vue.js, PHP, and SQL, being deployed with secure database integration
- Managed and transformed large datasets, automating workflows for data extraction and integration
- Supported university admissions processes, including application delegation, data management, and student communications
- Handled admissions logistics and administrative tasks, including application processing and records management

Vehicle Optimization, Dynamics, Control and Autonomy Lab — Ann Arbor, MI

Controls Research Assistant, May 2023 - May 2024

- Conducted algorithm simulations for advanced autonomous space vehicles utilizing mobile omni-directional platforms
- Modeled constraints and control systems to ensure precise regulation of rendezvous operations in orbital environments
- Created demonstrations of 3D mobilization utilizing motion capture and state estimation techniques on hardware representations
- Constructed interfaces for communicating between robots and ground station using a higher-level visual representation

Verified Aerospace Systems Lab — Ann Arbor, MI

Algorithms Research Assistant, September 2022 - May 2024

- Worked on the development of lightweight communication processes and computer vision algorithms to achieve safe and autonomous robot navigation
 - Conducted rigorous testing and application of formal verification methods in robotics tasks.
 - Handled data modeling, processing, and formalization for both autonomous and controller vehicles
 - Implemented filters and additional measures to monitor and ensure the validity of state estimation in a local plane or context
-

SKILLS/LANGUAGES

- Programming Languages: C++, C, C#, Python, Javascript, Matlab, Julia
 - Frameworks: ROS2, LCM, Django, Vue
 - Technical: Research, Data Management & Analysis, Iterative Algorithm Development
 - Professional: Mentorship, Tutoring, Leadership, Project Management, Advising
-

AWARDS/ACKNOWLEDGEMENTS

- Robotics Outreach Ambassador — August 2023
- Kessler Presidential Scholarship Recipient — May 2020
